SUMMARY

Product designer with 8 years in B2B SaaS, where I've shipped UI improvements to production, designed and shipped features end-to-end, and conducted user research across two companies.

WORK EXPERIENCE

01/2024 — Present **Customer Success Manager** London

Gearset

- Collaborated closely with Product, UX, and Engineering teams to identify design challenges and implement effective solutions.
- Initiated, scoped, developed, and successfully deployed 5 UI enhancements into Gearset's production codebase using Claude Code, with all submissions merged.
- Prototyped concepts and design solutions using AI tooling to validate ideas with PMs, UX designers, and engineers prior to development.
- Independently recognised a recurring customer friction point through support interactions, validated the issue via research, and was integrated into a cross-functional design project with a Product Manager to scope, design, and deploy the resolution.

07/2018 — 12/2023 **Product Designer & Client Success Lead** London

ProgressTeaching

- Conducted user research to pinpoint recurring pain points, synthesised findings into actionable themes, and designed solutions that informed the product roadmap.
- Spearheaded the end-to-end release of a new Teaching & Learning feature (Conditional Forms), architected the solution in Jira, and collaborated with Engineering for its deployment, achieving 70% user adoption within the first year post-release.
- Engineered a 10% year-on-year increase in adoption for a specific product area by partnering with Engineering to design, build, and release minor UI enhancements and bug fixes addressing customer challenges.
- Investigated the root cause of friction with the Appraisal product through user research and supported the Engineering team with a comprehensive redesign and post-GA improvements.
