SUMMARY

Product-minded B2B SaaS professional with 8 years of talking to users every day. I've designed and shipped features end-to-end, and built UI fixes that I pushed to Gearset's production codebase myself. Now moving into product design full-time.

WORK EXPERIENCE

01/2024 — Present **Customer Success Manager, Gearset**

- Run continuous user research across a portfolio of ~100 enterprise accounts: identifying recurring friction, synthesising it into themes, and bringing the evidence to Product and UX.
- Spotted, designed, and shipped 4 UI fixes to Gearset's production codebase using Claude Code, with no PM or designer assigned, saving an estimated 1 hour per user per month.
- Co-led merge conflict research with a PM: 12 customer interviews and an interaction flow map that informed 4 prioritised improvements, the first now shipped. Iterating on designs for the next improvement with a UX lens.
- Own customer problems through to resolution, escalating with evidence and following up with Product and Engineering until fixes ship.

07/2018 — 12/2023 **Client Success Lead (product & UX), ProgressTeaching**

Third employee; owned feature design and roadmap input alongside client success.

- Redesigned the product's most-used feature, lesson observation forms, adding conditional logic, flexible layouts, and tooltips, which cut related support requests by 72%.

- Co-led the Appraisal feature redesign with Engineering: interviewed users, synthesised feedback, and designed solutions, raising on-time appraisal completion by 41%.
- As the main customer-facing contact, gathered feedback from schools, themed requests in Jira, and prioritised the roadmap with the CEO and COO.
- Designed and released UI improvements to the Markbook feature with Engineering, lifting adoption 10% year on year.

05/2017 — 07/2018 **Senior Recruitment Consultant, Maze Executive**

07/2016 — 05/2017 **Recruitment Consultant, Hays**

09/2015 — 07/2016 **Communications Associate**, **University of Leicester**

EDUCATION

09/2012 – 07/2015 **University of Leicester**
Economics BSc (2:1)

09/2010 – 07/2012 **Hills Road Sixth Form College, Cambridge**
A level: Economics (B), Mathematics (B), Psychology (B)

SKILLS

Figma	AI-assisted workflows	Claude
VS Code	Prototyping	HTML
Jira	Wireframes	GitHub
